70 NEW TRAILERS FOR ST REGIS LOGISTICS

Fordham based St Regis Logistics (AAG Distribution), a wholly owned subsidiary of D S Smith Plc, has recently taken delivery of 70 new trailers - a mix of Cartwright and Lawrence David builds.

All were fitted with BPW running gear. The Airlight 2 suspension system was chosen, together with the ECOPlus hub and larger 4309T disc brake to help improve brake efficiency.

Fleet Engineer, Tim Arnold said, "Out of all the various makes of axle used in the fleet BPW's running gear has proved to be the most reliable and cost effective to operate and maintain".

St Regis Logistics, the largest manufacturer of paper in the UK, operate 190 vehicles and have 650 trailers on the road, most of these are tri-axle trailers with a large proportion now running on BPW axles.
